

The **CryptoBox live-CD** is made for people who want to encrypt their data without bothering about complicated technical issues.

A computer running the CryptoBox-live-CD works as a fileserver/NAS and encrypts all your private data.

Ingredients:

- ✓ live-CD (based on Debian GNU/Linux)
- ✓ comfortable Web-Interface
- ✓ strong encryption (AES, 256 Bit)
- ✓ user documentation

*The CryptoBox works together with every Windows-, Mac- or *nix-PC.*

You are allowed to do almost everything with this live-CD - especially: make copies and distribute them.
