

The **CryptoBox** is a bootable CD. It boots up, starting a secure fileserver - protecting your privacy from other's eyes.

Contents:

- ✓ a Debian based Linux-LiveCD
- ✓ a comfortable Web-Interface
- ✓ AES encryption (256 Bit)
- ✓ a user documentation

*[The CryptoBox works together with every Windows-, Mac- or *nix-PC. There is no technical knowledge required at all.]*

You may do nearly everything with this Live-CD (in particular: make copies and distribute them), unless you don't make profit with it.

version: 0.2
